---

COURSES

**Human-Computer Interaction (Coursera)   Design: Creation of Artifacts in Society (Coursera)
Model Thinking (At Present, Coursera)   Learning How To Learn (At Present, Coursera)**

EXPERIENCE

UX & UI Designer, trestor.org, Chandigarh, India
January, 2016 - March, 2016
Worked on a new design system for the whole brand, and its application on all the digital and physical interfaces with the user (website / web app / mobile apps / posters / billboards etc.). Also built the ui for web-wallet.

Product Designer, Hummingbill, Banglore, India
January, 2014 - March, 2015 (Remote) & April, 2015- December 2015 (Bangalore)
Hummingbill is an Accounts managing chrome extension. Working on the product iteratively helped in understanding the complexities of the real enterprise market, the importance of prototyping & research,making the problem solving approach better. It strengthened the importance of agile methodology and continuous integration for designing and building high quality products and services. Working with a small team gave a good understanding of the other parts of a business too (Marketing, PR, HR, Product Management, etc.)

Product Design Intern, Housing.com, Mumbai, India
May, 2014 – July 2014
Started with the Responsive Email Design for the real-estate startup's outgoing mailers. Moved on to designing modular and consistent structure for the micro-sites hosted on 3rd party platforms. Worked on prototype of a conceptual Material Design based Android App which got merged with their production app's design.

Front-end Dev & Product Designer, boyomo.co, Remote
September, 2013 – August, 2014 (Frontend Dev)
Worked on the Angular1 based Single Page Application. Learned the latest front-end web technologies (css pre-compilers, css/svg animation, WebGL, JS pre-compilers, MV frameworks & a bit of ruby).*

Web Design Intern, toptalent.in, Hyderabad, India
June, 2013 – August, 2013
Increasing the appeal of the landing page and making it more useful for the visitors. on the side worked on their marketing materials, data visualisation and printed infographics.

PROJECTS

Resource Allocation Tool based on Angular.js & Ruby on Rails

Created the Frontend for the tool which is currently used by the campus authorities for allocating academic resources to the faculty and students

Interface for measurement of long-term corrosion based damage in parts of a ship via Sonar

Created a d3 based tool for analysing the data gathered from sensors, and checking for damages

POSITIONS OF RESPONSIBILITY

Instructor In-Charge, *Introduction to Web Design Course,* **BITS Pilani**   *: 2014-15*
Taught a class of 40+ students about web design (typography, colour theory, Layout, User Centred Design, etc. & HTML, CSS, JavaScript) at a basic introductory level

Chief Designer, *Department of Creative Media,* **BITS Pilani**   *: 2014-15*
As the head of the design and dev club, I lead a team of ~20 students and collaboratively worked on the branding, websites and merchandise for all the 3 campus festivals (Waves, Quark & Spree)

RANDOM THINGS

Interested in topics like psychology (cog-psy, behavioural psychology, etc.), philosophy, Art (fine, cinema, photography, music, literature,etc.). Finding Patterns, Table Tennis, Learning, Collaborating, Volunteering.

Open to Relocation.
